DECLARATION

I, Pranabika Singha bearing Registration No.Ph.D./2413/2013, hereby declare that the subject matter of the thesis entitled “**Molecular Analysis Of Gene Cassettes And Their Correlation With Phenotypic Marker In Multidrug Resistant Enterobacterial Isolates**” is the record of work done by me and that the contents of this thesis did not form the basis for award of any degree to me or to anybody else to the best of my knowledge. The thesis has not been submitted in any other University.

Place:

Date:

ASSAM UNIVERSITY, SILCHAR

ACKNOWLEDGEMENTS

A deep relief and satisfaction on successful accomplishment of my research work. First and foremost I bow in reference to “The Almighty, omnipotent and omnipresent” for blessing me with vigorous passion, uninterrupted strength and indispensable patience needed to begin my project work and end it successfully.

I feel honoured to acknowledge my sincere thanks, deepest sense of gratitude to my guide **Dr. Amitabha Bhattacharjee**, Assistant professor, Department of Microbiology, Assam University, Silchar, for showering me with diligent guidance, abundant benevolence, perpetual inspiration and magnanimous affection during the course of my study. His keen interest, endless patience, altruistic help, constant encouragement, constructive criticism and affectionate attitude made me work on the project suggestions and fore thoughts. I am highly obliged to him for the cordial atmosphere in which he guided me throughout the period of work.

My sincere thanks to my co-supervisor **Dr. Debadatta Dhar** (Chanda), Associate Professor, Department of Microbiology, Silchar Medical College, Silchar, Assam; for providing me the clinical sample which boosts up my research.

I am my sincere gratitude to **Prof. Piyush Pandey**, Head of the Department, Microbiology, Assam University, Silchar, for supporting my

endeavour wholeheartedly and providing all the facilities to carry out my work efficiently.

I want to express my special appreciation to all the faculty members of Department of Microbiology for their incessant support and valuable advice throughout the work. I also take this opportunity to thank the technical, Laboratory and office staffs of the department for their service and assistance during the process.

I take this opportunity to acknowledge the SERB- FAST track project for providing financial assistance in the form of Research Fellow which helped me to complete my work comfortably.

I am grateful to all the people I have met along the way and have contributed to the development of my research. I acknowledge my sincere thanks to Dr. Anand Prakash Maurya and the entire team of Antimicrobial Resistant Research Laboratory for technical support and cooperation.

I am deeply thankful to my family members specially my in-laws (Ranadhir Bhattacharjee and Rubi Bhattacharjee) and my parents (Brajakishore Singha and Pramila Singha) for their love, support, untiring efforts and countless prayers. I want to dedicate this thesis to my husband Mr. Nishit Ranjan Bhattacharjee, without whom this thesis would have not been possible. I want to thank him for having faith in me and for being the greatest support during my tough days.

Pranabika Singha

CONTENTS

Chapter	Topic	Page No.
Chapter 1:	General introduction.....	1-7
Chapter 2:	Review of literature.....	8- 47
	2.1 Evolution of antibiotic resistance.....	8
	2.1.1 Multidrug resistance.....	10
	2.1.2 PAN drug resistance.....	14
	2.2 Transfer of antibiotic resistance.....	14
	2.2.1 Vertical gene transfer.....	15
	2.2.2 Horizontal gene transfer.....	16
	2.3 Genetic environment of drug resistance determinant.....	21
	2.3.1 Plasmids	21
	2.3.2 Insertion sequence.....	25
	2.3.3 Integrand	28
	2.3.4 ISCR.....	30
	2.4 Gene capture mechanism.....	35
	2.4.1 Evolution of Integron.....	35
	2.4.2 Multi Resistant Integron (MRI)	35
	2.4.3 Super Integron.....	38
	2.5 Gene cassette arrangement.....	39
	2.6 Resistance markers of Integron.....	40
	2.6.1 Trimethoprim resistance in Integrons.....	41
	2.6.2 Sulphonamide resistance in Integrons.....	43
Chapter 3:	Methodology.....	48-110
	3.1 Patient population	48
	3.2 Isolates for the study	49
	3.3 Isolation and identification of isolates	
	from clinical specimens.....	51
	3.3.1 Bacterial staining.....	51
	3.3.2 Motility (Hanging drop preparation)	53
	3.3.3 Biochemical characterization	55

Chapter	Topic	Page No.
	3.4 Antibiotic susceptibility.....	74
	3.5 Minimum inhibitory concentration (MIC) study	76
	3.6 Molecular screening of Integron	78
	3.7 Screening of sulphonamide resistance	80
	3.8 Amplification of gene cassette.....	90
	3.9 Amplification of whole class I integron	91
	3.10 Mapping of genetic arrangement of class II integron	98
	3.11 DNA fingerprinting of study isolates	105
	3.12 Plasmid incompatibility typing of the isolates	106
Chapter 4: Results.....		111-149
	4.1 Bacterial isolates	111
	4.2 Identification of bacterial isolates based on colony morphology.....	113
	4.3 Biochemical characterization.....	115
	4.4 Antibiotic susceptibility	118
	4.5 Minimum inhibition concentration	121
	4.6 Genotypic characterization	123
	4.7 Cloning of sul gene	124
	4.8 Amplification of gene cassette.....	129
	4.9 Amplification of whole class I integron	131
	4.10 Amplification, sequencing and mapping of class II integron gene cassettes and analysis of their clones	137
	4.11 DNA fingerprinting of study isolates.....	143
	4.12 Plasmid incompatibility typing of isolates with class I and class II isolates.	146
Chapter 5: Discussion.....		150- 171
Chapter 6: Conclusion.....		172- 174
Chapter 7: References.....		175- 198
Chapter 8: Appendices.....		I-X
	Abbreviations.....	I-II
	Composition of media.....	III-VIII
	Publications.....	IX-XI
