

List of Tables:

Table number	Table Caption	Page No.
1.1	Associated genes with breast cancer.	7
3.1	Chemical lists for the respective experiments.	49
3.2	Online software tools used for primer designing.	55
3.3	Primer sequence of different portion from the <i>BRCA1</i> , <i>TP53</i> , <i>GSTT1</i> , <i>GSTM1</i> and <i>GSTP1</i> gene.	56
3.4	Normal PCR cycling conditions.	64
3.5	<i>fast</i> COLD PCR cycling conditions.	66
4.1	Collection of samples from the different places of Southern Assam.	72
4.2	Details of primer properties length, GC Content, Molecular weight, ATGC composition of each primer.	87
4.3	Primer sequence of different portion from the <i>BRCA1</i> and <i>TP53</i> gene.	89
4.4	Characteristics of sequenced breast carcinoma patients.	104
4.5	<i>BRCA1</i> Deleterious mutation in North-Eastern breast cancer patients, India.	104
4.6	GSTs polymorphism in breast cancer patients from Southern Assam.	108
