

LIST OF TABLES

<i>Table No.</i>	<i>Name of the table</i>	<i>Page No.</i>
4.1	Religion of the patient	78
4.2	Educational qualification of the patient	80
4.3	Number of persons having primary level education	86
4.4	Number of dependent family members	88
4.5	Water system for other purposes	98
4.6	Means used for purification of water	99
4.7	Domestic animals/birds	102
5.1	Maintenance of proper hygiene during menstruation	124
5.2	Frequency of changing pads/cloths in a day	126
5.3	Patient's consent at first coitus	130
5.4	Patient's consent in each intercourse	132
5.5	Age of the patient at first child birth	133
5.6	Place of delivery	135
5.7	Family planning device used	137
5.8	Any problem in using family planning method	140
5.9	Kind of diseases	143
5.10	Reasons for the disease (according to the doctor)	146
5.11	Patient's realization about the disease	147
5.12	Restriction of work due to the disease	149
5.13	Family members' consideration of the problem as a disease	151
5.14	Reason behind not accepting the disease	152
5.15	Age of the patient at the time of abortion	154
5.16	Reason for abortion	156
5.17	Procedure used for abortion	158
5.18	Reason for not taking vaccination	160
5.19	Place preferred for delivery of a child	161

5.20	System of medicine used frequently	164
5.21	Distance from SMCH	166
5.22	Type of medical treatment given	168
5.23	Reasons for discontinuation of the treatment	170
5.24	Content of knowledge of the patients about HIV/AIDS	173
5.25	Patient's knowledge about family planning	175
5.26	Whether the patient support family planning or not	177
5.27	Patient's knowledge about vaccination	180
5.28	Whether the patient believe that unsafe drinking water can cause some disease or not	182
5.29	Reason behind a child being male or female according to the patient	185
5.30	Materials used for washing hands	187
5.31	Whether the patient wash hands before taking food or not	188
5.32	Regular exposure of bed to sunlight	189
5.33	Use of insecticides to sanitize the house from mosquitoes and flies	190
5.34	Daily cleanliness of the environs	192
5.35	Causes for which the patient can not discuss about the disease openly	203
5.36	Reason for preferring female doctors	205
5.37(1)	Cross tabulation of educational qualification of the patient with age at first coitus	206
5.37(2)	Chi-Square tests of educational qualification of the patient and age at first coitus	207
5.38(1)	Cross tabulation of educational qualification of the patient with patient's consent at first coitus	207
5.38(2)	Chi-Square tests of educational qualification of the patient and patient's consent at first coitus	208
5.39(1)	Cross tabulation of educational qualification of the patient with the number of children	208

5.39(2)	Chi-Square tests of educational qualification of the patient and the number of children	209
5.40(1)	Cross tabulation of educational qualification of the patient with patient's knowledge about HIV/AIDS	209
5.40(2)	Chi-Square tests of educational qualification of the patient and patient's knowledge about HIV/AIDS	210
5.41(1)	Cross tabulation of educational qualification of the patient with patient's support to family planning	210
5.41(2)	Chi-Square tests of educational qualification of the patient and patient's knowledge about HIV/AIDS	211
5.42(1)	Cross tabulation of educational qualification of the patient with the habit of washing hands daily before taking food	211
5.42(2)	Chi-Square tests of educational qualification of the patient and the habit of washing hands daily before taking food	212
5.43(1)	Cross tabulation of educational qualification of the patient with the use of insecticides by the patient	212
5.43(2)	Chi-Square tests of educational qualification of the patient and the use of insecticides by the patient	213
5.44(1)	Cross tabulation of educational qualification of the patient with the daily cleaning of toilets	213
5.44(2)	Chi-Square tests of educational qualification of the patient and the daily cleaning of toilets	214
5.45(1)	Cross tabulation of educational qualification of the patient with the maintenance of hygiene	214
5.45(2)	Chi-Square tests of educational qualification of the patient and the maintenance of hygiene	215
5.46(1)	Cross tabulation of educational qualification of the patient with patient's knowledge about the water borne diseases	215
5.46(2)	Chi-Square tests of educational qualification of the patient and patient's knowledge about the water borne diseases	216
5.47(1)	Cross tabulation of educational qualification of the patient	

	with frequency of changing pads/cloths per day	216
5.47(2)	Chi-Square tests of educational qualification of the patient and frequency of changing pads/cloths per day	217
5.48(1)	Cross tabulation of educational qualification of the patient with continuation of the treatment	217
5.48(2)	Chi-Square tests of educational qualification of the patient and continuation of the treatment	218
5.49(1)	Cross tabulation of educational qualification of the patient with family income of the patient per month (approximately)	218
5.49(2)	Chi-Square tests of educational qualification of the patient and family income of the patient per month	219
5.50(1)	Cross tabulation of the family income of the patient with patient's knowledge about HIV/AIDS	219
5.50(2)	Chi-Square tests of the family income of the patient and patient's knowledge about HIV/AIDS	220
5.51(1)	Cross tabulation of the family income of the patient with patient's support to family planning	220
5.51(2)	Chi-Square tests of the family income of the patient with patient's support to family planning	221
5.52(1)	Cross tabulation of the family income of the patient with the use of insecticide	221
5.52(2)	Chi-Square tests of the family income of the patient and the use of insecticide	222
5.53(1)	Cross tabulation of the family income of the patient with the maintenance of hygiene	222
5.53(2)	Chi-Square tests of the family income of the patient and the maintenance of hygiene	223
5.54(1)	Cross tabulation of family income of the patient with patient's knowledge about the water borne diseases	223
5.54(2)	Chi-Square tests of family income of the patient and patient's knowledge about the water borne diseases	224

5.55(1)	Cross tabulation of family income of the patient with continuation of the treatment	224
5.55(2)	Chi-Square tests of family income of the patient and continuation of the treatment	225
