Appendix

[Tool Used For Data Collection]

Interview Schedule

District:

Block:

Gram Panchayat:

Samsad:

Village:

Post Office (with Pin Code):

A. Demography:

1. Name of the Head of the Households :

2. Respondent Details :

a). Name of the Respondent :

b). Age :

c). Gender :

d). Educational Qualification :

3. Profile of the Households :

a). Religion :

b). Caste :

c). Household Occupation :

d). Profile of the Household Members:

Sl.No.	Name	Relation to Head	Age	Sex	Educational Qualification	Occupation
1.						
2.						
3.						
4.						
5.						
6.						
7.						
8.						
9.						
10.						

B: Awareness Regarding Sanitation

1. Do you think that every household should have toilet latrine? Why?

2. Some people dispose in open, do you think the feces might have impact to people around you?

3. On what occasions do you usually wash your hands?

After urinate	
After defecate	
Before eating	
After eating	
Before cooking	

4. Why do you wash your hands after these activities?

5. Do you usually use other substances except soap when washing your hands? If yes, what is the name of the substance you use? Why give detail.

6. Where do you usually wash your hands?

7. How do you clean yourself after you defecate?

8. The last time your youngest child defecates, how did you dispose your child's feces?

9. Has anybody or any institution explained to you about sanitation issues, defecating in open air, and habits of clean living?

10. Where did you know/ get information about sanitation issues?

11. Where do you hope to get more information on sanitation issues?

12. Do you think that the neighbourhood have an adequate water supply for any toilet related activity?

13. In your opinion, if your children get sick, could it be caused by the drinking water?

14. What illness/ disease that caused by the drinking water?

Diarrhoea	
Cholera	
Typhoid	
Influenza	
Cough	
Other (Specify)	

Responses mutually not exclusive

15. In your opinion, if your children get sick, could it be caused by not washing hands?

16. What illness/ disease that caused by not washing hands?

Diarrhoea	
Cholera	
Typhoid	
Influenza	
Cough	
Other (Specify)	

Responses mutually not exclusive

17. Does any child within your neighbourhood got diarrhoea in last two years?

18. According to you, what causes diarrhoea? Please explain.

19. In your opinion, how could you / someone prevented from diarrhoea?

20. What can you do to prevent your child from diarrhoea?

Cook the water first before drinking	
Drink water containing chlorine	
Use other way/ certain way to clean the water	
Clean the house	
Clean the neighbourhood	
Defecating in toilet	
Wash hands with soap	
Wash the fruits/ vegetables	
Prepare a well cooked food	
Other (Specify)	

Responses mutually not exclusive

21. In your opinion, could diarrhoea be the caused of under 5 years old child death?

22. What do you mean by safe drinking water? What are the sources of safe drinking water?

23. Does your source of water for cooking and drinking located around your house?

24. How long does it take from your house to reach the water supply, take the water and then go back to your house?
25. And who usually get the water from the water supply for your household need?
26. In what type of container is the water carried from your main source?
27. What is the source of water that your household use for cooking and for drinking water during the rainy season?
28. What is the source of water that your household use for cooking and for drinking water during the dry season?
29. Do you have any difficulties to obtain clean water during the dry season? If yes what type of problem?
30. What actions to be taken as per you to overcome the water crisis during dry season?
31. Does your water supply that your household is using for bathing and washing is the same from your water supply for cooking and drinking?
32. Do you think you have adequate land within your household to build the toilet?
33. Do you normally live in this house?
34. How many people currently live in this house?

35. READ THE STATEMENT

Please give a value according to the best condition you know/ see in your surroundings, where **1** signifies STRONGLY DISAGREE and a score of **5** signify STRONGLY AGREE. You are free to give an assessment; there is no right or wrong answer.

NB: ® denotes reverse coded (as statement is negative towards the construct) and should be reversed for analysis.

	Statement	Response				
		Strongly Agree	Agree	Undecided	Disagree	Strongly Disagree
1	In this community it is normal for people to defecate in the open®	5	4	3	2	1
2	Some people have a latrine but prefer to defecate in the open ®	5	4	3	2	1
3	In this community people do not look after their latrines®	5	4	3	2	1
4	It is not normal for people to defecate in the open	5	4	3	2	1
5	People in this village would disapprove of anyone who defecates in the open	5	4	3	2	1
6	Families in this community cannot expect any help from others to improve their latrine ®	5	4	3	2	1
7	In this community it is easy to get good information on how to build a good latrine	5	4	3	2	1
8	There are community organisations who can assist people in building an improved latrine	5	4	3	2	1
9	In this community it is easy to find financial support to build a good latrine	5	4	3	2	1
10.	People in this village support one another to build better latrines	5	4	3	2	1
11.	People in your family know how to build a latrine	5	4	3	2	1
12.	Someone in your households would know how to build a pit for a latrine but not know how to build the slab ®	5	4	3	2	1
13.	Nobody in your household knows how to build an improved latrine ®	5	4	3	2	1
14.	People in your family would be confident in improving a latrine to have a safe slab	5	4	3	2	1
15.	People who defecate in the open are disgusting	5	4	3	2	1
16.	People who share latrines are more at risk of getting diarrhoea	5	4	3	2	1
17.	It is important to improve your latrine to stay healthy	5	4	3	2	1
18.	People who defecate in the open put the whole community at risk of disease	5	4	3	2	1
19.	Families that improve their latrines are good members of the community	5	4	3	2	1
20.	Families who share latrines with others put their children at risk of disease	5	4	3	2	1

21	People in this community would be ashamed if a visitor stepped in human shit in the fields near the village	5	4	3	2	1
22	Shitting is natural it does not matter where you do it. ®	5	4	3	2	1
23	People in this community improve their latrines to be healthy	5	4	3	2	1
24	People in this community get more comfort from a using a clean, safe latrine	5	4	3	2	1
25	People in this village feel uncomfortable if they have to use a dirty, smelly latrine	5	4	3	2	1
26	If people in this community continue to defecate in the open then everyone is at risk	5	4	3	2	1
27	People in this village will be able to relax once they know everyone has improved their latrines	5	4	3	2	1
28	People in this community are worried about children getting sick from poor sanitation	5	4	3	2	1
29	People in this community are improving their latrines so that everyone can be healthy	5	4	3	2	1
30	There is nothing people can do to improve their health, it is up to God whether they are healthy ®	5	4	3	2	1
31	It is important for people to try to be hygienic and clean so they can stay healthy	5	4	3	2	1
32	Fate will decide whether people get sick ®	5	4	3	2	1
33	It is important to take control of your health by doing those things that will stop	5	4	3	2	1
34	People in this community would feel ashamed if they did not have a	5	4	3	2	1
35	People in this community are proud once they have improved their latrine	5	4	3	2	1
36	People will think badly of someone who does not keep their latrine clean	5	4	3	2	1
37	In this community people would rather buy a mobile phone than build a latrine ®	5	4	3	2	1
38	School fees are more important than improving a latrine ®	5	4	3	2	1
39	Building a latrine that keeps a family healthy is the best use of a families resources	5	4	3	2	1
40	A household needs a bicycle more than a latrine ®	5	4	3	2	1

C. Impact on Health

1. Occurrence of Diseases among Lower Age Group Women (i.e. 15-30 years) in last two years due to NOT using sanitary latrine

Who suffered	Name of the diseases as per Doctors	Duration of suffering	Treatment taken or not	Sources of treatment	Cost of treatment	Remarks

2. Occurrence of Diseases among Higher Age Group Women (i.e. 31 - 44 years) in last two years due to NOT using sanitary latrine

Who suffered	Name of the diseases as per Doctors	Duration of suffering	Treatment taken or not	Sources of treatment	Cost of treatment	Remarks

D. Economy:

1. Economic Status of the Households

Economic Status	Response
BPL	
APL	

2. Land-holding Status

Land holding Status	Response
Landless	
Own Homestead Land (with Amount)	
Cultivable Land (with Amount)	

3. Households Expenditure (in Rs.)

Item	Daily	Monthly	Annual
Food			
Housing			
Fuel and Light			
Clothing			
Transport			
Medical treatment			

Education			
Electricity			
Festival			
Rituals			
Recreation			
Intoxication			
Miscellaneous			
Total			

4. a) Has there been any extra-ordinary expenditure during last one year?

Yes/No b) If yes, reason for such expenditure.

c) Expenditure (in Rs.)

5. a) Cost of Cultivation (per *Bigha* in Rs.)

Crops	Land Engaged	Seed	Human Labourer	Bullock Labourer	Fertiliser	Pesticide	Others	Total

5.b) Income from Cultivation (in Rs.)

Crops	Land Engaged	Production(Qtl.) /Biga	Market price/Qtl.	Total Production	Total Income

5.c) Households Income [Excluding Agriculture] (in Rs.)

Sources of Income	Monthly Income (in Rs.)	Annual Income (in Rs.)
Salary		
Wage		

Rent		
Business		
Pension/Interest		
Regular Remittance Received		
Other (specify)		
Total		

5.d) Total Annual Households Income (Rs.)

From Agriculture	
From Others	
Total	

6. Some Assets and Facilities of the Households:

Items	Responses	Remarks
Own Building		
Type of Building		
Number of Rooms		
Separate Kitchen Shed		
Drainage System available		
Separate Toilet Facility		
Own Source of Safe Drinking Water		
Other Sources of Safe Drinking Water		
Separate Cattle Shed		
Electricity		
Radio		
Television		
Refrigerator		
LPG for Cooking		
Agricultural Implements		

7. Livestock and Poultry birds

	Own	Share
Cow		
Heifer		
Bullock		
Buffalo		
Ox		
Goat		
Hen		
Duck		
Pig		

E. Policy Measure for promoting sanitation at household level

1. Who are the main sufferers due to non availability of sanitation facility within the households?
2. Is there any past experience that any woman of this village has taken any initiative to get sanitation facility within the household?
3. Do you think that women can play a vital role to get a toilet within the household? If yes specify.
4. Do you think that women members of a family able to take better initiative to maintain the existing toilet facility? Explain.
5. What role can play by male members of the household to get proper toilet facility within the households? Take detail note.

6. Is there any existing programme of Government of India implemented by local panchayat to have the toilet facility of each and every household?

7. According to your opinion what roles can play by local panchayat to promote the sanitation system for all households of this village?

8. Is there any NGOs/institutions are working on sanitation programme in this villages? If yes take detail about NGOs/institutions and terms and conditions.

9. What are the main problems in implementation of Rural Sanitation programmes in this locality? Explain in detail.

10. According to your opinion what is the actual procedure to reach the 100 percent coverage of sanitation programme. What are the steps to be taken and by whom to solve the problem permanently?

11. Who will act as a middle man between villagers and NGOs/Institutions/Government to implement Rural Sanitation Programme? Why do you think so?

12. Is there any committee in any level to look after the sanitation problem in this area? If yes, give detail about the membership.

13. Do you think that a committee (Rural Sanitation Committee) is essential in village level/GP level/block level/district level to implement the Rural Sanitation programme?

14. Who will be the members of the committee?

15. How to form a committee?

16. What are the activities of the committee?

17. Do you think that any other institutions are to be involved to implement the Rural Sanitation Programme?

18. Do you think that local SHGs have a vital role to play for the implementation of Rural Sanitation Programme? If yes give detail

19. Do you think that NREGA (Now MGNREGA) has any role to implement Rural Sanitation Programme?

20. What role you should have to play to implement properly the Rural Sanitation Programme?

21. Do you like to listen to Radio?

22. What time do you usually listen to the radio most often?

23. What is the name of the radio station you have ever listened to?

24. Do you like to watch Television?

25. What time do you usually watch TV most often?

26. What is the name of the TV station you have ever watched?

27. What is the name of the newspaper you have ever read?

28. Give your suggestion (If any)
